Set column and row headings, transpose options and more.

Add link to the series code to display the classifications and metadata pages from Navigator.

Add links to the datatype to display the definition from Navigator.

Select to display the expression description or number.
**USING THE DATASTREAM REQUEST TABLE**

The Request Table enables you to define the detail of each request – series, lists, expressions, datatypes, dates and the format, and control the updating of the requests, to facilitate the creation and modification of complex models.

<table>
<thead>
<tr>
<th>Action</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Update table</td>
<td>Select an equity search from the Datastream interface to update.</td>
</tr>
<tr>
<td>Schedule tables to update using the AFO Index.</td>
<td>The editors facilitate the creation and editing of requests with multiple series (or datatypes &amp; expressions).</td>
</tr>
<tr>
<td>Create lists of series for requests.</td>
<td>Run macros before and after update.</td>
</tr>
<tr>
<td>Select to refresh template based Datastream Charts after update (taking account of series changes in list).</td>
<td>Switch off screen updating and calculation to speed up update.</td>
